Luxury Evening Wear
E-Commerce Web Project

Web Technologies Project | PHP & HTML/CSS

Project Overview

What is it?

A PHP-based e-commerce website for a luxury evening wear brand — NOOR Collections — featuring a live shopping cart powered by PHP sessions.

Built With

PHP · HTML5 · CSS3 · Bootstrap 4 · Font Awesome 6 · XAMPP Apache server · Session-based cart storage

Purpose

Academic mini-project demonstrating server-side scripting, session management, and responsive front-end UI design.

Key Features

Product Catalog

3 luxury evening gowns with images, names, descriptions & INR pricing

Session Cart

PHP session-based cart — items persist without any database

Qty Controls

Inline +/– buttons update quantity instantly

Remove & Clear

Remove individual items or clear entire cart with one click

PRG Pattern

Post-Redirect-Get stops duplicate form submissions on refresh

Luxury UI

Dark ink & gold palette, Cormorant Garamond, hover animations

Product Collection

Bestseller

Red Floor Length
Chiffon Prom Dress

₹12,499

New Arrival

Gradient One Shoulder
Ombre Evening Dress

₹14,999

Limited

Modest Red Mermaid
Short Sleeve Gown

₹10,999

How It Works

1

User Visits Page

PHP starts session & loads products

2

Clicks Add to Cart

POST form submits to same PHP file

3

PHP Processes

Checks duplicates Updates $_SESSION

4

PRG Redirect

header() redirects to prevent re-submit

5

Cart Displayed

PHP loops session shows items & total

Tech Stack

PHP 8
Backend Logic

Session management, POST/GET handling, input sanitization, PRG redirect pattern

HTML5 / CSS3
Structure & Style

Semantic markup, CSS variables, keyframe animations, flexbox layout

Bootstrap 4
Responsive Grid

12-column grid, responsive breakpoints, and utility classes for mobile

Font Awesome 6
Icons

Cart, gem, plus/minus, xmark icons used throughout the interface

XAMPP
Local Server

Apache + PHP local development environment on Windows

Google Fonts
Typography

Cormorant Garamond (headings) + Jost (body) for a luxury editorial aesthetic

Future Scope

MySQL Database

Replace session cart with a relational DB for persistent orders and user data

User Login

Register/login system for customers to track orders and manage wishlists

Payment Gateway

Integrate Razorpay or PayU for real INR checkout processing

Order Management

Admin dashboard to view orders, manage inventory and product listings

Search & Filters

Filter by price, size, category — full-text search across catalog

Mobile App

React Native app consuming a PHP REST API for mobile shoppers
